

Learning Starts to Click!

Buttons, songs, and learning fun! The Click 'n Learn Remote has them all. Here are some ways to engage your baby in play:

- **Invite baby to explore and discover** all of the buttons on the remote. Each one has a different response. As the toy responds to baby's actions, the concept of cause and effect is introduced.
- **Sing along to the songs.** As you sing and baby listens, you're boosting developing vocabulary by exposing them to rhyming words and phrases.
- **Count as you press each number.** You'll show that each number has its own name!
- **Introduce colors and shapes.** "That's the red button, let's find the green one. The purple button has a red square—and a green triangle too!"

Laugh & Learn Every Day

When does your baby learn? Every day! And you can reinforce the learning in so many ways.

Walking up and down stairs is an opportunity to count or introduce opposites like **up** and **down**. "Let's count as we walk down the stairs, 1, 2, 3, 4, 5! Now let's go up the stairs — 1, 2, 3, 4, 5!"

Foster a love for developing language by making up rhymes and singing together.

Explore more opposites. "The music volume is **high**. Let's turn it down **low**."

Enhance object identification when your child begins to point at things. "That's mommy's **nose**. Where's your nose?"
